What are the risks of investing?

Risk indicator for the Nikko AM Balanced Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five year period to September 2023. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates. See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

How has the fund performed?¹

| | Average over past 5 years | Past year |
|--|---------------------------|-----------|
| Annual return <i>(after deductions for charges and tax)</i> | 1.92% | 3.62% |
| Annual return <i>(after deductions for charges but before tax)</i> | 2.14% | 4.75% |
| Composite of market index annual return and peer group indices annual return <i>(reflects some deduction for charges² and no deductions for tax)</i> | 4.38% | 7.60% |

Nikko AM is relying on the Financial Markets Conduct (Market Index) Exemption Notice 2018 and have created a composite index in order to calculate the market index annual return. The Manager believes the use of a composite benchmark for these funds would be useful to investors in assessing the performance of the fund as a whole. The composite market index for each fund is made up of the index of the underlying sector funds (where an Appropriate Market Index or Peer Group Index is available) multiplied by the respective target investment mix. Some of the underlying sector fund index returns include imputation credits. The fund returns include imputation credits.

Annual return graph^{2,3}

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2023.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Nikko AM Balanced Fund are charged fund charges. In the year to 31 March 2023, these were (inclusive of GST where applicable):

| | % of net asset value |
|--|----------------------|
| Total fund charges | 0.93% |
| Which are made up of: | |
| Total management and administration charges | 0.93% |
| Including: | |
| Manager's basic fee | 0.73% |
| Other management and administration charges* | 0.20% |
| Total performance-based fees | 0.00% |

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Nikko AM Diversified Funds Product Disclosure Statement (PDS) for more information about fees.

On 1 July, the Manger's fee increased to 0.84%, other management and administration fees decreased to 0.10%. Total fund charges are now 0.94%

*An underlying fund, the Nikko AM Wholesale Multi-Strategy Fund, into which the Fund invests, has expenses embedded.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Simon had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Simon received a return after fund charges were deducted of \$475 (that is 4.75% of his initial \$10,000). Simon also paid no other charges. This gives Simon a total return after tax of \$362 for the year.⁴

The total value of the top 10 investments makes up 20.06% of the net asset value of the fund.

There is currency exposure on international assets in the fund as only a portion of this is hedged. Currently the fund's foreign currency exposure is 21.17%.

For underlying funds that the Fund invests in which use currency hedging, foreign currency exchange contracts are used to mitigate currency risk. However, it is not possible to fully mitigate all currency risks, and therefore the currency hedging in place may not fully replicate the currency exposure of your investments. It should be noted the allocation to funds which currency hedge their assets comprises the value of the underlying assets and the value of the currency hedges. Accordingly, as the value of currency hedges change the exposure to underlying assets will be less than or greater than the disclosed allocation.

For more information on currency exposure please refer to the Statement of Investment Policy and Objectives (SIPO) which can be found on the Disclose register at <https://disclose-register.companiesoffice.govt.nz/>.
